

**Amendments to the Specification:**

Please replace paragraph 0016 with the following amended paragraph:

However, the conventional image-capturing device 100 described as above captures moving pictures as its main function and still images as its extra function. As a result, conventional DVCs capture and store images that have a resolution and image quality that are excellent for moving pictures, but which are poor for still images, relative to stand ~~along~~ alone digital still cameras.
